

RESOLUTION 378-092015

A RESOLUTION NOMINATING A CANDIDATE FOR THE
COMAL APPRAISAL DISTRICT BOARD OF DIRECTORS

WHEREAS, the City of Garden Ridge has been notified of the upcoming Comal Appraisal District Board of Directors Election; and

WHEREAS, the City of Garden Ridge is entitled to vote and may nominate a candidate by resolution for inclusion of the official ballot for the Comal Appraisal District Board of Directors Election; and

WHEREAS, the City of Garden Ridge desires to nominate a candidate and submits the nomination before October 15, 2015.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF GARDEN RIDGE, TEXAS;

That the City of Garden Ridge nominates _____ as a candidate for Comal Appraisal District Board of Directors Election and directs that an original copy of this Resolution be forwarded to Curtis Koehler, Chief Appraiser, Comal Appraisal District.

PASSED AND APPROVED BY THE CITY COUNCIL OF GARDEN RIDGE, TEXAS, this 2nd day of September, 2015.

Nadine L. Knaus
Mayor

REF: Board of Directors Election

It is time to begin the Board of Directors election process for the 2016-2017 term. Each voting entity may nominate candidates for each position by resolution as stated in the tax code quoted below:

Section 6.03(g) of the Texas Property Tax Code states *"Each taxing unit other than a conservation and reclamation district that is entitled to vote may nominate by resolution adopted by its governing body one candidate for each position to be filled on the board of directors. The presiding officer of the governing body of the unit shall submit the names of the unit's nominees to the chief appraiser before October 15."*

Each candidate must be eligible to serve as stated in the tax code quoted below:

Regarding eligibility, Section 6.03(a) states *"To be eligible to serve on the board of directors, an individual other than a county assessor-collector serving as a nonvoting director must be a resident of the district and must have resided in the district for at least two years immediately preceding the date the individual takes office. An individual who is otherwise eligible to serve on the board is not ineligible because of membership on the governing body of a taxing unit. An employee of a taxing unit that participates in the district is not eligible to serve on the board unless the individual is also a member of the governing body or an elected official of a taxing unit that participates in the district."*

For your convenience we have attached a list of the current Board of Directors and whether or not the member is willing to serve again. Please submit the names of your nominees to this office no later than October 15, 2015 so they may be placed on the official ballot.

Sincerely,

Curtis Koehler, RPA
Chief Appraiser

Subject: Placement of Pumpkin Patch signs for Bracken UMC

Dear Ms. Cain:

As Chair of the 2015 Bracken UMC Pumpkin Patch, Bracken UMC is requesting approval from the City of Garden Ridge for the placement of promotional signs for this year's Pumpkin Patch. As in the years past, we will be placing the signs on or in the front of Church member's properties, with their permission. The signage will be up for forty (40) days, starting Tuesday the 22nd of September (our first delivery truck arrives on Monday evening the 21st).

We will place a banner on the fence on the northeast corner of FM 2252 and FM 3009. This property is owned by Dennis Wetz. The banner will be placed next to the permanent Bracken UMC sign currently in place there.

A second Pumpkin shaped wooden sign will be placed in front of the home of Annette Hawkins at 19831 FM 2252. The third sign will be located in front of the home of Greg and Nancy Rathburn at 20218 FM 2252.

Thank you for your consideration of our request for the City's approval of the placement of these signs for our 2015 Pumpkin Patch.

Respectfully,

Steve Rice (256) 533-5996
2014 Pumpkin Patch Chair

**RE: ORICA USA INC.'S REQUEST FOR PARTIAL EXEMPTION PERMIT TO CONDUCT
BLASTING PURSUANT TO ORDINANCE 34-052012 OF CITY OF GARDEN RIDGE, TEXAS**

Dear Nancy Cain:

Orica USA Inc. submits this letter for consideration of a Partial Exemption Permit to conduct blasting as defined in City of Garden Ridge, Texas Ordinance 34-052012.

As required by Ordinance 34-052012, the letter includes:

1) The name of the designee.

Orica USA Inc.

2) The name of the designee's representative for purposes of the application (if the designee is not a natural person).

Byron Lossett (Operations Superintendent) Orica USA, West Region

3) Copies of any state or federal licenses and permits authorizing the Requestor to possess and use explosives.

Refer to Appendix 1.0

- Orica USA Employee Authorized Signature List
- ATF Notice of Clearance For individuals transporting, shipping, receiving, or possessing explosives materials
- Orica USA (18 U.S.C. Chapter 40, Explosives License / Permit)
- Blaster's Permits

4) Complete contact information, including name, address, phone number, facsimile number and e-mail address for the City's use in processing the application. The contact information provided shall be used for all communications in connection with the processing of the application and the operation.

Contact during the application process:

Name: Byron Lossett
Address: 4004 Granada Drive
Georgetown, TX 78628
Phone #: 512-966-8395 (Cell)
Email: byron.lossett@orica.com

Contact for blasts fired at the Lehigh Hanson — Servtex Quarry

Name: Byron Lossett
Address: 4004 Granada Drive
Georgetown, TX 78628
Phone #: 512-966-8395 (Cell)
Email: byron.lossett@orica.com

5) A full description of the designee's legal and factual relationship to the property(ies) upon which the Blasting shall be conducted.

Legal Name: Orica USA Inc.

Relationship: Explosives' Supplier to the Lehigh Hanson — Servtex Quarry

6) A detailed description of the operation to be conducted.

Blast Plan: Lehigh Hanson – Servtex Quarry

Benches

- Prior to blast, all benches will be inspected for potential problem areas.
- Potential problem areas seen during face inspection will be profiled.
- Profiles will be dated and saved to digital media in case information is required later.
- The face height shall be designed as to allow for safe blasting procedures, to minimize air blast and ground vibration.
- Hole depths will be set at three feet below the desired floor elevation.

- Any changes in bench height or actions taken to correct the bench height will be clearly noted in the blast report.
- Drill logs will be provided for all bore holes. Hole depths will be verified and checked against the drill logs. Drill logs will be attached to their respective blast reports. Any deviation in hole depth 5% or more as well as potential problems noted in the drill logs will be brought to the quarry superintendent's attention for discussion and resolution.
- If conditions on the bench pose a safety hazard the mine superintendent will be notified immediately so conditions and solutions can be discussed.

Timing and Patterns

- Blasts patterns will be laid out in such a way that will allow for safe loading and initiation of all loaded bore holes.
- Multiple row blasts will be laid out on a staggered pattern.
- Patterns will be designed and laid out by Orica personnel. If cracks from fault lines prohibit pattern layout or might create an unsafe drilling or loading condition, it will be immediately brought to the mine superintendent's attention so conditions and solutions can be discussed.
- Burden and spacing will be verified prior to blasting. If burden or spacing differ from blast plan by two feet or more it should be reported to the quarry immediately and solutions discussed at that time. If conditions on the bench pose a safety hazard the mine superintendent will be notified immediately so conditions and solutions can be discussed.
- Any deviation from the blast plan shall be discussed with and approved by the quarry superintendent, and clearly noted in the comments section of the blast report. All factors shall be considered and discussed prior to deviating from the blast plan.

Administrative

- Daily explosive inventories and the total explosive use per day will be turned in to the quarry location manager. The quarry location manager will co-ordinate with Hanson office personnel for purchase orders and invoices. Copies of the full blast report packet will be provided to the quarry administrative office and the Orica location manager within 24 hours of the blast.

Type of Explosives (Bulk Explosives and Initiation Systems)

- Bulk Ammonia Nitrate Prill and Fuel Oil (Blasting Agent)
- Bulk Emulsion Blends=Ammonium Nitrate Solution + Fuel Oil + Ammonium Nitrate Prill
- Cast Boosters
- Electronic Detonator Assemblies
- Nonel – non-electric Detonators

7) The period of time the anticipated use shall continue.

Orica USA Inc. anticipates continuing to perform blasting services at the Lehigh Hanson - Servtex Quarry through the 2 year period of the existing contract (i.e. with June 1, 2015 as the start date).

8) Any supplemental information requested and deemed pertinent by the City Administrator.

Not applicable at this time

9) Any supplemental information the designee deems pertinent prior to City Council consideration.

Proof of Insurance

- Refer Appendix 1.0 for the Certificate of Liability Insurance

Monitoring

- A third party selected by the Regulatory Authority shall perform the primary seismic monitoring.
- Orica will utilize the Site Law Model, a software modeling program to predict a blast's PPV. The Site Law Model determines the minimum instantaneous charge weight for each shot prior to loading.
- Ground vibration shall not exceed the frequency based PPV limit of 70% of the USBMZ – curve as recorded by any monitor designated by the Regulatory Authority.

Weather

- Orica will monitor all weather patterns and conditions prior to loading each shot. The blaster will communicate with quarry management and discuss any weather conditions that may adversely affect the ground vibration and air blast reading or the outcome of a blast, prior to loading a shot.

Guidelines

- Orica may modify the above guidelines based on the past history and knowledge gained over time from the previous blast fired at Lehigh Hanson – Servtex Quarry. Analysis of ground vibration and air blast data collected from past seismic monitoring at the Lehigh Hanson Servtex Quarry will provide a basis in the modification of guidelines.
- Orica will conduct its blasting practices within the guidelines set forth by Federal, State and Local Governing Agencies while maintaining strict adherence to Orica blasting policies and procedures.

Also, included in this letter are the attachments identified below:

1) Identifying all real property where the activity of Blasting shall be conducted by street address (if any) and legal description. Any property not listed will not be included in any permit, if authorized. If multiple properties are to be considered, and some are not within the City limits, but is within the City's extra-territorial jurisdictional limits, please include each property in the list but designate the property with the comment: "ET J Property".

Map of Blasting Area

- Refer Appendix 1.0 for the Lehigh Hanson Servtex Quarry Map

2) If you are not the owner of the real property, a letter from the Owner executed before a notary, that they are the owner of the property and authorize blasting activities on the property.

Letter from the Owner

- Refer Appendix 1.0 for the letter from Hanson (provided for the permit)

3) Documentation and facts demonstrating that the Requestor's Blasting operation is going to be conducted in a manner that minimizes its related adverse impact on property value, other land use development, the economy, employment, property taxes and the public and communities who live and work adjacent to such land use. Please specifically list all steps taken, such as distance limitations related to adjacent properties, use of berms and any dust and noise remediation efforts, etc.

- The attached is being provided for the permit
 - Lehigh Hanson Servtex will maintain the required distance off of the property line.
 - Use of water trucks to water haul road to minimize dust.
 - Built the berm between the quarry and Trophy Oaks for noise and dust control
 - Monitor weather conditions to plan shots days and timing of when the shot is initiated.
 - Refer to Section 9, of Attachment B — to Ordinance 34-052012

4) Documents and facts demonstrating efforts by designee to protect and mitigate the perceived negative adverse affects such activity has on real property values, public safety, health & welfare interests, including the quality of life within the City, neighboring properties and the public.

Refer to Section 9, of Attachment B — City Ordinance 34-052012

- Orica will continue to safely conduct blasting operations as it has in the past year, All efforts will be made to conduct all blast in a safe manner while meeting the strict guidelines of the Garden Ridge City Ordinance 34-052012

5) Payment of the appropriate application fee, including any related City fees for monitoring blasting for each permitted Partial Exemption Permit site.

- To be paid by Orica USA Inc. upon receipt of invoice (to be done by Byron Lossett)

If you require any additional information or have any comments or questions to this letter, please do not hesitate to contact me at the phone, e-mail or address set forth above.

Thank you for your time, and we look forward to working with the City of Garden Ridge on this matter.

Sincerely,

Byron Lossett
Operations Superintendent

NOTICE OF CLEARANCE

for individuals transporting, shipping, receiving, or possessing explosive materials.

ISSUED TO: ORICA USA INC

Federal Explosives license/permit no.: 5-TX-091-20-5L-12375

NOTICE DATE: 11/17/2014

Expiration Date: November 1, 2015

EXPIRATION DATE: This Notice expires when superseded by a newer Notice which will list all current responsible persons and employee possessors, or when the license or permit expires - whichever comes first.

Explosives License/Permit Type: 20-MANUFACTURER OF EXPLOSIVES

- 1 **WARNING.** Only those individuals listed below as RESPONSIBLE PERSONS and EMPLOYEE POSSESSORS with a background clearance status of "CLEARED" or "PENDING" are authorized to transport, ship, receive, or possess explosive materials in the course of employment with you.
- 2 **"DENIED" STATUS.** If an employee possessor has a background clearance status of "DENIED", you MUST take immediate steps to remove the employee from a position requiring the transporting, shipping, receiving, or possessing of explosive materials. Also, if the employee has been listed as a person authorized to accept delivery of explosive materials, you MUST remove the employee from such list and immediately, and in no event later than the second business day after such change, notify distributors of such change, as stated in 17 CFR 555.33(a).
- 3 **CHANGE IN RESPONSIBLE PERSONS.** You MUST report any change in responsible persons to the Chief, Federal Explosives Licensing Center, within 30 days of the change and new responsible persons MUST include "appropriate identifying information" as defined in 27 CFR 555.11. Fingerprints and photos are NOT required, however they will be required upon renewal of the license or permit.
- 4 **CHANGE OF EMPLOYEES.** You MUST report any change of employee/possessors to the Chief, FELC, within 30 days. Reports relating to newly hired employees must be submitted on ATF Form 5400.28 for EACH employee.

Premises Address: 5844 FM 482

This 'Notice of Clearance' is provided to you as required by 18 U.S.C. 843(h) and MUST be retained as part of your permanent records and be made available for examination or inspection by ATF officers as required by 27 CFR 555.121. If you receive a Notice subsequent to this Notice, this Notice will no longer be valid.

In accordance with 27 CFR 555.33, Background Checks and Clearances, and 27 CFR 555.57, Change of Control, Change in Responsible Persons, and Change of Employees, ATF's Federal Explosives Licensing Center (FELC) has conducted background checks on the individual(s) you identified as a responsible person(s) and an employee/possessor(s) on your application, or reported after the issuance of your license/permit.

The following is a SUMMARY of the results of the background checks conducted on the individuals you reported as responsible persons and employee/possessors. ATF will be notifying ALL individuals listed on this document of their respective status by separate letter mailed to their residence address.

PLEASE BE ADVISED THAT IT IS UNLAWFUL FOR ANY PERSON REFLECTING A STATUS OF "DENIED" TO TRANSPORT, SHIP, RECEIVE, OR POSSESS EXPLOSIVE MATERIALS.

Please carefully review this Notice to ensure that all the information is accurate. If this Notice is incorrect, please return the Notice to the Chief, FELC, with a statement showing the nature of the error(s). The Chief, FELC, shall correct the error, and return a corrected Notice.

EXPLOSIVES BLASTER - RENEWAL

THIS PERMIT MUST BE KEPT POSTED ON THE PREMISES AT ALL TIMES AND IS ISSUED AND ACCEPTED ON CONDITION THAT ALL REGULATIONS NOW ADOPTED, OR MAY HEREAFTER BE ADOPTED, SHALL BE COMPLIED WITH.

THIS PERMIT IS SUBJECT TO REVOCATION FOR ANY APPLICABLE FIRE CODE VIOLATION(S) AND DOES NOT TAKE THE PLACE OF ANY LICENSE REQUIRED BY LAW AND IS NOT TRANSFERABLE.

THIS EXPLOSIVES BLASTER - RENEWAL PERMIT IS UNASSIGNABLE AND NON-TRANSFERABLE AND NO PERSON SHALL OPERATE UNDER, OR HAVE THE BENEFIT OF, ANOTHER PERSON'S PERMIT.

RE: Orica's Application for a Partial Exemption Permit for Blasting in October 2015 through September 2016.

Nancy,

We have asked Orica to pursue obtaining a Partial Exemption Permit for Blasting within the City Limits of Garden Ridge per Ordinance 34 for the fiscal year of 2016. We will assist with any necessary documentation for the permit. If there is any questions or concerns, please contact me directly at Jacob.Scherer@hanson.com or my office phone (210) 658-7461.

Best Regards,

Jacob Scherer

Subject: RE: 2016 Partial Exemption Blasting Permit Packet

Joe,

The submittal letter references the **documents** and that is why I **was asking**. May be better if the **letter** is adjusted to **reflect** that the documents are not attached but a copy has been provided to the city. I was concerned that **with the reference to the attachments** and there being no **attachments** that may stimulate questions from the Commission.

Thanks,
Nancy Cain

Subject: RE: 2016 Partial Exemption Blasting Permit Packet

Joe,

Received Buckley Powder's packet for requesting a Partial Exemption Permit. In reviewing the packet I have found it to be incomplete in accordance with Attachment B of Ordinance 35-082012. The following are excerpts from Attachment B that need to be provided before I am able to submit to the Quarry Commission.

4) Documentation and facts demonstrating that the Requestor's Blasting operation is going to be conducted in a manner that minimizes its related adverse impact on property value, other land use development, the economy, employment, property taxes and the public and communities who live and work adjacent to such land use. Please specifically list all steps taken, such as distance limitations related to adjacent properties, use of berms and any dust and noise remediation efforts, etc.

5) Documents and facts demonstrating efforts by designee to protect and mitigate the perceived negative adverse affects such activity has on real property values, public safety, health & welfare interests, including the quality of life within the City, neighboring properties and the public.

Please feel free to contact me with any questions you may have.

Thanks,
Nancy Cain

Buckley Powder Company

DATE: July 27, 2015

Included with this packet is a copy of the Buckley Powder Blasting Standard Operating Procedures. This document is very specific as to the proper procedures required to provide optimum results for our customer while also providing a safe environment for Buckley Powder employees, those employed by our customer, and the surrounding community. All Buckley Powder blasters are required to attend at least 40 hours of classroom training and testing to ensure they have a complete understanding of these procedures. Along with classroom training, they are provided extensive field training before ever actually being assigned duties as a lead blaster.

Also included is a copy of Open Pit Blaster Training. This course provides a thorough understanding of the fragmentation process and how to minimize vibration and air over pressure which may affect the surrounding community. Blasters are taught all calculations necessary to safely obtain the production goals of the customer while minimizing the environmental effects. Once again they must pass written tests in the classroom and are audited in the field to ensure they are following these calculations and procedures. As new and improved techniques are introduced to the industry, blasters are brought in to be trained on the new information as well as refreshed on previous topics.

Buckley Powder now blasts approximately 30,000,000 tons of rock per year in the San Antonio – New Braunfels area. Our blasters and technical staff are very familiar with the geological abnormalities which must be addressed to keep environmental effects to a minimum. The included documents are quite lengthy – so we will list below the typical process involved for blasting in the Edwards Aquifer area.

Included on the next page is an illustration of a typical bench to be blasted and the terminology for many of the parameters considered in the design of the blast.

Blast Design Terminology

A	Hole - to - Crest	G	Crest	M	Explosive Column Height
B	Apparent Burden*	H	Crest Burden	N	Subdrilling
C	Apparent Spacing*	I	Bank Angle	P	Toe Burden
D	Hole Diameter	J	Toe	Q	Stemming Height
E	Back Break	K	Bench Height	R	Collar
F	Side Break	L	Hole Depth		

* True Burden and True Spacing may be different than Apparent Burden and Apparent Spacing due to delay pattern.

We teach our blasters that there are four things which occur when rock is blasted :

- The rock is broken or fragmented
- There is a heaving affect
- Vibration is created
- Air overpressure is created

If a blast is properly designed, the energy of the explosives will be used to do the first two in the list and there will be less energy left to create vibration and air overpressure. Thus the correct pattern to properly distribute the energy through the rock is the first important consideration. We know from experience how many pounds of explosives per cubic yard or ton of rock (powder factor) will give satisfactory fragmentation. If we under load a blast, it may actually create higher vibration. Extensive research calculations have been developed which aids in predicting vibration at a given distance based on the pounds of explosives detonated at 8 millisecond intervals. Based on the two above factors a blast pattern can be determined.

Laying out the blast pattern

As illustrated in the diagram, previous blasting will create a face which many times will be irregular; depending on the local geology. A two dimensional laser profiler will be used to determine at what distance from the crest holes should be placed in order to have the proper burden (amount of rock in front of the hole). There will be times when geological abnormalities may be observed and require the holes to have additional burden placed on them in order to minimize any venting of energy through the various seams; which may increase air overpressure. If this is necessary the spacing between holes in this row will be reduced to maintain the proper powder factor. The location of each hole is marked by the blaster.

Drilling

The driller will be given documentation of the pattern. This will include a diagram of the hole locations. The required depth of the holes will be indicated. Depths are determined from the initial data from the laser profiler. In order to properly break the rock at the bottom of the hole, the holes will be drilled slightly deeper than the actual bench height. In areas of vibration concern, this subdrill should be kept to a minimum. Excessive subdrill tends to increase vibration due to the over confinement in this area of the blast. The driller will be asked to provide a log of each hole. These logs will provide information concerning variations in geology; with the depths of these variations noted. This is very important data which aids the blaster in making determinations on how the hole should be loaded.

Loading the blast pattern

Before the blast is loaded, a three dimensional auto scan laser profiler will be used. This unit allows the exact location of each hole to be surveyed. It then can be set up to scan the face and collect upwards of 100,000 data points. If there are any "divets" in the face that requires more refinement of resolution, additional points can be scanned in that area. Various reports will be generated from the data, which will aid the blaster in determining what must be done to eliminate problems (examples included at the end). The most important of these reports are the actual profiles of each front row borehole. These profiles show the exact burden in front of the hole. The software can also be set to look a predetermined distance on either side of the hole for any lesser burdens which might be influenced by this hole. With these reports in hand, the blaster will visually examine the face one more time and make notes on the print outs of any variations in the loading which should take place.

All holes will be checked for proper depth. If any have excessive subdrill which may increase vibration, they will be backfilled to the proper depth. Detonators and cast boosters will be placed in the holes as needed and the hole will be loaded with bulk explosives. The blaster will monitor the rise of the product in the hole. If there any abnormalities such as cracks and voids the powder will stop rising and the blaster will immediately stop to address the issue. In most cases an inert material such as crushed stone will be placed in this area of the borehole to avoid the accumulation of excess explosives. Trucks are equipped with meters as an added check to ensure the proper amount of explosives is being placed in each hole. In

the cases where a full column may be too large to maintain the desired vibration level; the load in the hole may be divided into smaller charges separated by inert material. These smaller charges will be timed to detonate separately to reduce vibration. If seams of softer material or clay have been noted on drill logs or observed by the blaster as he inspects the face; inert material will be placed in that area of the column to prevent venting which may increase air overpressure and noise. The powder column will be stopped at a predetermined distance from the top of the hole. This is called the stemming area and will be filled with crushed stone to create confinement at the surface.

Electronic Detonators

The development of electronic detonators has greatly improved the ability of our industry to reduce vibration from blasting. The accuracy of these detonators has allowed us to be very predictive as to our end results. Software has been developed which allows us to blast one hole, collect the vibration data; apply that data to a multiple hole scenario; and with a fair amount of accuracy predict what the results will be from that blast. The software we have allows us to enter the exact parameters of a particular blast pattern, and see what the vibration should be based of various timing sequences. Though our vibration levels are never close to a level which will do damage to a structure, we can many times find a sequence which is less perceivable and acceptable to the community.

Conclusion

There are few places left where our customers have not had developments build around them. Buckley Powder has been very successful helping those customers deal with community concerns. We take great pride in our education program for our personnel concerning safety and technology. If you have further questions concerning our procedures, please contact us.

RE: Partial Exemption Permit

Mrs. Cain,

Buckley Powder Company would like to be considered for a Partial Exemption Permit with the City of Garden Ridge. We have two gentlemen that will be our representatives for the purpose of this application: Mr. Joe Crownover and Mr. Jason Mims. The complete contact information for these gentlemen is as follows:

Joe Crownover
Manager of Seismic Operations
13003 Lemur Lane
Cypress, TX 77429
512-517-5179
joe.crownover@buckleypowder.com

Jason Mims
Account Manager
P.O. Box 1358
Georgetown, TX 78628
254-534-0022
jasonm@buckleypowder.com

Buckley Powder will be blasting for the crushed stone operation of Hanson Aggregates during the 2016 fiscal year.

If you have any questions or concerns please feel free to contact either Mr. Crownover or Mr. Mims.

Sincerely,

Joe Crownover, PG
Manager of Seismic Operations

RE: Buckley Powder's Application for a Partial Exemption Permit for Blasting in October 2015 through September 2016.

Nancy,

We have asked Buckley Powder to pursue obtaining a Partial Exemption Permit for Blasting within the City Limits of Garden Ridge per Ordinance 34 for the fiscal year of 2016. We will assist with any necessary documentation for the permit. If there is any questions or concerns, please contact me directly at Jacob.Scherer@hanson.com or my office phone (210) 658-7461.

Best Regards,

Jacob Scherer

Change of Address (27 CFR 555.54(a)(1)). Licensees or permittees may during the term of their current license or permit remove their business or operations to a new location at which they intend regularly to carry on such business or operations. The licensee or permittee is required to give notification of the new location of the business or operations no less than 10 days prior to such removal with the Chief, Federal Explosives Licensing Center. The license or permit will be valid for the remainder of the term of the original license or permit. (The Chief, FELC, shall, if the licensee or permittee is not qualified, refer the request for amended license or permit to the Director of Industry Operations for denial in accordance with § 555.54.)

Right of Succession (27 CFR 555.59). (a) Certain persons other than the licensee or permittee may secure the right to carry on the same explosive materials business or operations at the same address shown on, and for the remainder of the term of, a current license or permit. Such persons are: (1) The surviving spouse or child, or executor, administrator, or other legal representative of a deceased licensee or permittee; and (2) A receiver or trustee in bankruptcy, or an assignee for benefit of creditors. (b) In order to secure the right provided by this section, the person or persons continuing the business or operations shall furnish the license or permit for that business or operations for endorsement of such succession to the Chief, FELC, within 20 days from the date on which the successor begins to carry on the business or operations.
